Preface to NSQF Level-5 Compliant Revised Edition

This book adopts the approach of covering the entire curriculum through Multiple Choice Questions (MCQ). This is in tune with the adoption of OMR based exam, which is succeeded by the online examination system – both of which are based on objective type examination. The proposed online examination system will make the examination systems simpler to organize and evaluate. But, the candidate needs to acquire proficiency in technical knowledge and the use of computers to ensure that time is not wasted in mundane tasks like navigating between questions.

The latest curriculum prescribed under the National Skills Qualifications Framework (NSQF) brings about an important turning point in the history of vocational training. The NSQF envisages continued upgradation of skill levels through a rating scale of 1 to 10. DGT has revised curricula of all trades under Craftsmen Training Scheme. DRAUGHTSMAN CIVIL has been fixed at NSQF level-5 under Construction Sector.

Week 1 to 26 of the new curriculum focusses on Engineering Drawing, construction materials and building components. Week 26 to 52 of the curriculum focusses on different methods of surveying and building components. This book aims to help the students acquire good familiarity with the subject matter through a carefully graded collection of questions and answers.

This Q–bank has been prepared strictly in accordance with the curriculum prescribed by DGT covering subject matter sequentially through different chapters, each containing fairly large number and rich bank of multiple choice questions on All India Trade Test pattern, supplemented by latest solved AITT question papers.

The reforms in the examination system (conversion of biannual exam schedule to annual exam schedule) offer a bit of freedom to concentrate on the subject without the fear of exam every few months. It is pertinent to add here that although DGT issued order No. MSDE – 18011/DGT/2017 – TTC dated 19th April 2018, stating that the trainees admitted in August 2018 session and thereafter will have to appear for annual trade test (unlike semester system).

Wishes to all readers of the book to excel in education, proficiency in skills and success in professional and personal lives.

Contents

1 Semester 1 – Week 1 to 26 (For Annual A.I.T.T. Exam - First Year) **1**

1.1 Engineering Drawing . . . 1
1.1.1 Introduction to Engineering drawing . . . 1
1.1.2 Lettering in Engineering drawing . . . 1
1.1.3 Dimensioning in Engineering drawing . . . 2
1.1.4 Scaling in Engineering drawing . . . 2
1.1.5 Layout of drawing sheets . . . 3
1.1.6 Isometric view . . . 3
1.1.7 Oblique view . . . 4
1.1.8 Pictorial View/ Perspective view . . . 4
1.1.9 Orthogonal View . . . 4
1.1.10 Method of folding drawing sheet . . . 5
1.1.11 Grades of pencil . . . 6
1.1.12 Types of line . . . 6
1.2 Stones . . . 7
1.3 Bricks . . . 11
1.4 Lime . . . 17
1.5 Pozzolanic Admixtures . . . 19
1.6 Cement . . . 21
1.7 sand . . . 26
1.8 Mortar . . . 27
1.9 Concrete . . . 29
1.9.1 Admixtures . . . 35
1.10 Timber . . . 35
1.11 Alternates to timber . . . 38
1.12 Tar, bitumen & asphalt . . . 39
1.13 Paint . . . 39
1.14 General properties of paints and varnishes . . . 45
1.15 Metals . . . 46
1.16 Plastics . . . 48
1.17 Sequence of building construction . . . 50
1.18 Building components . . . 51

1.19 Stone masonry 52
1.20 Brick Masonry 55
1.20.1 Hollow block masonry 61
1.21 Foundation 63
1.22 Shoring, scaffolding and underpinning 72
1.23 Damp Proofing and protective treatment of structures 76
1.24 Fire protection 77
1.25 Arches 79
1.26 Lintels 81

2 Semester 2 – Week 27 to 52 (For Annual A.I.T.T. Exam - First Year) **83**
2.1 Surveying 83
2.1.1 Introduction to surveying 83
2.1.2 Principles of surveying 83
2.1.3 Types of surveying 84
2.1.4 Accuracy of surveying 85
2.1.5 Chain survey 86
2.1.6 Corrections to chained length 88
2.1.7 Bearing & meridian 89
2.1.8 Planimeter & pentagraph 90
2.2 Leveling 90
2.2.1 Using autolevel 90
2.2.2 Principle of leveling 91
2.2.3 Types of leveling staff 91
2.2.4 Equipment required for leveling 92
2.2.5 Parts of an Autolevel 92
2.2.6 Procedure for setting up autolevel 93
2.2.7 Temporary and permanent adjustments of Autolevel 93
2.2.8 Terminology in leveling 93
2.2.9 Types of leveling 95
2.2.10 Reduction of levels 95
2.2.11 Contouring 96
2.3 Theodolite survey 98
2.3.1 Introduction to theodolite 98
2.3.2 Parts of theodolite 99
2.3.3 Types of theodolite 99
2.3.4 Setting up of theodolite 100
2.3.5 Temporary and permanent adjustments to theodolite 101
2.3.6 Fundamental lines of theodolite 102
2.3.7 Methods of measuring angles - vertical & horizontal 102
2.3.8 Errors in repetition 103
2.3.9 Method of setting out straight line 103
2.3.10 Latitude and departure 104
2.3.11 Consecutive and independent coordinates 104

2.3.12 Instrumental errors and their elimination . . . 105
2.3.13 Theodolite traversing . . . 105
2.3.14 Plotting traverses . . . 105
2.3.15 Gales traverse system . . . 106
2.3.16 Traverse tables . . . 106
2.3.17 Terms in triangulation survey . . . 106
2.4 Carpentry . . . 107
2.4.1 Tools and terminology in carpentry . . . 107
2.4.2 Carpentry operations . . . 109
2.4.3 Carpentry joints . . . 110
2.5 Doors & windows . . . 112
2.5.1 Terminology . . . 112
2.5.2 Doors . . . 113
2.5.3 Windows . . . 116
2.6 Electrical wiring . . . 118
2.6.1 Basic electricity . . . 118
2.6.2 Electrical equipments . . . 120
2.6.3 Wiring toolkit . . . 122
2.6.4 Safety precautions . . . 122
2.6.5 Systems of domestic wiring . . . 123
2.7 Floors . . . 124
2.7.1 Types to flooring . . . 124
2.7.2 Finishings for floor . . . 126
2.8 Stairs . . . 126
2.8.1 Terminology . . . 126
2.8.2 Requirements for stairs . . . 128
2.8.3 Types of stair . . . 129
2.9 Roofing . . . 130
2.9.1 Types of roof . . . 130
2.9.2 Types of pitched roof . . . 131
2.9.3 Terminology on pitched roof . . . 132
2.9.4 Roof trusses . . . 133
2.9.5 Types of roof truss . . . 134
2.9.6 Roof covering . . . 135
